UBS AG
Bahnhofstrasse 45
8001 Zurich, Switzerland

Dear Hiring Team,

I am writing to express my interest in the "2025 Graduate Talent Program – Tech – Data Application Engineer – ZH" position at UBS as advertised on LinkedIn. With a strong background in backend development, microservices, and web development, along with hands-on experience at leading organizations like Santander Group and Telefónica, I am confident that my skills and achievements align with your company's needs.

In my current role as a Jr. Backend Developer at Santander Group, I am developing microservices using the Java Spring Boot framework, directly contributing to the seamless operation of Santander and Openbank applications. Previously, at NTT Data, I enhanced internal information retrieval processes by creating a personalized chatbot application powered by OpenAI APIs and building a vector database with LangChain. These experiences have not only honed my technical expertise in Java but also my ability to deliver impactful solutions on time.

I am particularly drawn to UBS's principle of client centricity, as I firmly believe in putting clients at the heart of everything we do. My experience in creating user-centric solutions, such as an AR application for Wi-Fi signal mapping during my internship at Telefónica, aligns well with this philosophy. Moreover, I share UBS's emphasis on connectivity, as seen in my collaborative approach to solving technical challenges in diverse, fast-paced environments.

I would be delighted to further discuss how my background and skills align with your team's goals. Thank you for considering my application. I look forward to the possibility of contributing to UBS's continued growth.

Kind regards,
Samuel Lopez
